

SENIOR LIVING AUTOMATION

Safety & Security | Comfort & Convenience | Centralized Management

**SAFTI AND COMFORT FOR SENIORS
PRODUCTIVITY FOR MANAGEMENT**

Cairos Automation provides solutions for senior residents which incorporate safety and security measures. Our automation solutions also ensure convenience and comfort of elderly people.

For aged people moving around a lot could be a problem. We solve that problem by offering an IBMS for the monitoring of the entire facility from one location.

SAFETY & SECURITY

Call Buttons

Whenever the occupant needs assistance the centrally monitored wireless or wired call buttons and pull cords could be used from any corner of the house. With these tools, the person in need can acquire immediate response.

Safety/Security

Sensors

In case of a gas leak, smoke and intrusion the occupant would receive an alert on his smartphone that will enable him to act accordingly. Video door phones and CCTV surveillance would allow the resident to keep tabs on visitors.

COMFORT & CONVENIENCE

Remote Control

Automation

The occupants can operate all home appliances automatically using remote controls from lights and fans to curtains and doors.

Smart App Automation

The automatic pump controller ensures supply and efficient use of water, whereas the automatic garden irrigation makes horticulture a relaxing occupation. All could be achieved, from controlling temperature to bolting doors, with the Smart Application.

CENTRALIZED MANAGEMENT

Facility Management System

All the household assets and property information could be managed through smart applications with the assistance of this system. This solution aids intricate management operation including Maintenance Tasks, Service Requests etc.

Integrated Building Management System [IBMS]

This system allows Safety and security devices, sensors and surveillance tools across the household, home appliances like lights, pumps and motors to be operated from a center.
